-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group **Art Unit 2614**.
2. This communication is responsive to the preliminary amendment filed 4/17/2006.

Election/Restriction

3. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - I. Claims 1-35, drawn a method for selecting user data transmitted from at least one called subscriber to a calling subscriber via at least one telecommunication network during initiation of a call, comprising: deriving called subscriber transmission address data from a response message of a called subscriber received by the calling subscriber and containing the called subscriber transmission address data in addition to called subscriber reception address data; and using the called subscriber transmission address data for selection by the calling subscriber of user data subsequently received by the calling subscriber from the called subscriber, wherein the calling subscriber receives other user data from at least one other called subscriber; the telecommunication network includes a cellular mobile radio communication network; said deriving derives the called subscriber transmission address data from at least one of a

provisional session initiation protocol message and a final session description protocol message sent by the called subscriber to the calling subscriber and so on.

- II. Claims 36-38, drawn to the structures/structural elements of an apparatus for selecting user data transmitted from at least one called subscriber to a calling subscriber via at least one telecommunication network during initiation of a call, comprising: derivation means for deriving called subscriber transmission address data from a response message of a called subscriber received by the calling subscriber and containing the called subscriber transmission address data in addition to called subscriber reception address data; and selection means for using the called subscriber transmission address data for selection by the calling subscriber of user data subsequently received by the calling subscriber from the called subscriber, wherein said selection means includes either a MGCF and a IN-MGW or a MRFC and a MPFP.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. **Currently, claims 20 and 36 have been found generic.**

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
